4.2 - Library as a Learning Resource

4.2.1 - Library is automated using Integrated Library Management System (ILMS)

Although the college has a great number of text and reference books and N-list subscription it lacks desired automation the college doesn't have an Integrated Library Management System. We are aware that the main aim of any library is to provide access to proper information, to the right users in a short time. In an environment of information explosion, due to the growing demands of the user and shrinking of financial resources, the library is not able to obtain all the reading materials on demand. In the absence of an integrated library management system most of the tasks of the library are done in the traditional manual way. Whether it is book searching by the name of Author, Title, and Accession Number every thing is done with the help of library accession and issue registers.

Although the college has a great number of text and referencebooks and N-list subscription it lacks desired automation thecollege doesn't have an Integrated Library Management System. Weare aware that the main aim of any library is to provide access toproper information, to the right users in a short time. Inan environment of information explosion, due to the growing demandsof the user and shrinking of financial resources, the library isnot able to obtain all the reading materials on demand. In theabsence of

anintegrated library management system most of the tasks of the library are done in the traditional manual way. Whether it is book searching by the name of Author, Title, and Accession Number every thing is done with the help of library accession and issue registers.
